Rivers Risk specializes in public-private risk and safety management with experience designing policy and protocols that strategically manage risk. We assist in identifying risks and the issues that may affect your budget by collaborating with you and your team to:

- Identify operational risk and safety issues.
- Analyze claims experience by identifying what causes claims and help develop protocols that stop them from happening.
- Identify potential threats and vulnerabilities in business operations that create risk.
- Assist in implementing strategic risk and safety resiliency processes for insurability and financial rating purposes.

We work in partnership to design risk and safety programs that meet the dynamic needs of your operations. Our firm has successfully helped local and county governments and regional non-profits reinvent relationships with their insurance providers to minimize insurance and claims expense and maximize coverage.

The Rivers' approach to risk and safety emphasizes responsible fiscal management. Our goal is to build long-lasting relationships with our clients by offering customized risk management solutions that are personable, relatable, cost effective and achievable.

Marilyn Rivers, CPCU ARM AIC is a nationally recognized public entity leader, strategist, and educator in the field of risk management with over thirty-five years of risk and safety experience. She has firsthand experience in establishing best practice standards for property and casualty fiscal risk management. Her expertise lies in her ability to connect with the folks she partners with to overcome communication issues and achieve consensus. *Marilyn is a risk warrior that makes risk work for the folks who live it and are responsible for it.*

An investment in risk and safety management promotes excellence in fiscal governance.

Our firm can assist you in making your governance risks budget neutral and insurable.
